

## MPS DEFENDER 6000

### PROACTIVE SITE PROTECTION

The DEFENDER 6000, using SS enabled technologies, is a standalone, effective and proactive detection, deterrent, and reporting system. The included MPS Defense functionality offers the ability to arm and disarm one system or a whole site. This system can detect activity in the protected area, turn on super bright LED lighting, flash the strobe light, control the warble siren and produce alerts via emails, SMS, and the MPS Defense System cell phone application. When a monitoring service is used, the activity can be investigated with snap shots and/or live and historical video; then prompt predetermined action can be taken.

#### FEATURES

- 3600 lumen flood lights provide light around the area for both deterrent and providing better light in dark areas.
- 3 megapixel fixed camera, a viewing range of 100° provides a great view.
- PIR detector to reach out 40+ feet to detect motion in the area. (optional 80')
