

## MPS LOT VIEW 6000

### CLEAR VIEW OF A LARGE AREA

The Lot View 6000 system provides wide and clear view of a large area. This configuration has an 8MP 180° camera of a lot that for general observation of an area with historical recoding from the cameras. The cameras also have configurable motion detection to create detection zones that allows adjustable regions of interest. When there is motion in a region, the system will provide a notification of that motion. Also included are infrared based motion detector, strobe light, and a 5 GHz WiFi communications device.

To use the LOT VIEW 6000, you must have an MPS VMS Base Station. The VMS Base Station Includes a laptop with VMS software along with optional licenses for cameras, and a 5 GHz communications device that will mount external to the building with line of site to the LOT VIEW 6000s.

The system can provide up to 30+ days of recordings, allowing the ability to go back in time to review historical video.
