

CONTRACTOR 3400

PROTECTION AND DETERRENCE

The Contractor 3400 hybrid mobile security trailer configuration is primarily designed to protect unattended sites. It offers a reliable video surveillance platform that provides the ability to monitor an area. There are two 1080P PTZ cameras that see in very low light conditions and have embedded IR illuminators to see in total darkness, and one 2MP fixed camera looking down at the trailer for trailer security. There are PIR sensors that detect motion around the trailer and support the Arm/Disarm features of the Defense System package.

This configuration is ideal for unattended long-term deployment. The system will operate using a gas or diesel generator for a few weeks on a tank of fuel and will have the ability to be monitored remotely via cellular. The Contractor configuration has a full complement of defense options that include:

- To protect a site against unwanted intruders, this configuration uses several technologies to detect the presence of motion. The automaton engine of the Contractor 3400 constantly monitors motion and tamper sensors and determines, through logic, if a detection has a high confidence level of being valid before it sends a notification.
- The three mid-mast lighting kit will flash for the first 15 seconds creating an undeniable indication that the motion has been sensed. The body riding lights also flash informing intruders that the system has detected their presence.

KEY FEATURES

- Commander 3400 Mobile Surveillance System
- 36 ft. Stabilized Electric Mast system
- Fold Down Electric Mast Operation
- Gas Generator System – Approx. 20+ Day Operation per full tank
- 1200 Ah AGM Battery Pack

- Heavy Duty Front Wheeled Jack
- 2 – PTZ Camera 30X 1080P, IR
- 1 – Dome Camera 2 MP, 1080P
- 4G Cellular Modem/Router
- WiFi System Local Hot Spot/WAN as WiFi
- 16 Port Gig Network Switch
- Semi-Hardened Laptop VMS 2 TB HD
- Video Management Software
- HID Multiclass Card Reader with Keypad
- 3 – 40', 120° Motion Detectors
- 40,000 Lumen Top Mast Light Kit
- MP Status and Control System
- 15,000 Lumen Mid Mast Kit
- Tool-less Removable Camera Mounts
- 4 Camera Internal Storage Rack
- Robust Email and SMS Notifications
- Arm/Disarm the system locally and remotely
- MPS Defense System
- Full Automation Kit
- Approx. 25 Days of Retained Recordings
