

DEFENDER 3400

PROTECT YOUR ASSETS

The Defender 3400 configuration offers a simple and effective proactive detection and deterrent tool. This configuration solution is engineered for general monitoring and protecting of key, medium-sized protection areas. This configuration can be used to view recorded or live video including the ability to zoom into critical or areas of interest to get sharp video images.

Using the MPS-3400 power platform with its detection and deterrent solutions, with one PTZ camera and one fixed camera, it can detect activity in the protected area, turn on bright LED lighting and flash the trailer lighting. When activity is detected reports are received, emails are sent with snapshots. When a monitoring service is used, the activity is investigated with snap shots and live/historical video allowing for prompt predetermined action to be taken.

KEY FEATURES

- Commander 3400 Mobile Surveillance System
- MP Status and Control System
- MPS Defense System
- Arm/Disarm the System Locally and Remotely
- Robust Email and SMS Notifications
- 36 ft. Stabilized Electric Mast System
- Fold Down Electric Mast Operation
