

NIGHT SIGHT 6000

TOTAL DARKNESS VIEWING

The Night Sight Power Sentry configuration is ideal for monitoring when you do not have other light sources in the area. This configuration provides high quality video imagery and includes a PIR motion sensor to detect activity in the area. The Night Sight easily mounts on existing poles with 120 VAC - 277 VAC constant power and operates wirelessly 24/7, providing live video streaming and recording. This system uses a high definition camera that is extremely effective when used with the included IR illuminators. The IR lighting is produced via two 45W 850nm x 120° IR illuminators which dramatically increases the ability for the camera to see in total darkness.

KEY FEATURES

- **Light up the Night** – This configuration uses the latest technology in IR illumination. These two 45W illuminators provide a flood of IR light to illuminate images in the dark for the video, which would normally be invisible to the naked eye.
- **Visibility** – See everything with the megapixel fixed camera providing a great field of view.
- **Detect Activity** – There is a single PIR detector to reach out 40+ feet to detect motion in the area (optional 80'). In addition, the camera provides high quality visual motion detection. With the lighting, it is possible to detect activity in total darkness.
- **Scheduled Operation** – Activate your system during specific hours
- **Deploy** – Mounts on wall or pole
- **Power** – This system is primarily configured for constant power operation.
- **Communicate** – Via embedded 4G cellular connection/WiFi
- **Be Informed** – Receive emails on alarms
- **Remote Video Access** – See live video of the remote location
- **Record** – For up to 5 days, includes SD card storage (based on camera configuration)
- **Forensics** – System maintains 3-5 days of recorded video available at any time
- **Remote Control** – Control and reset your system
- **Remote Status** – MP Status provides the ability to see critical information about your device, remotely control activities, and be notified of any abnormalities
